

ABSTRACT

AN IMPLEMENT FOR AUTOMATICALLY DETACHING AND DISPLACING AN
AMOUNT OF FEED, SUCH AS FOR EXAMPLE SILAGE OR HAY

5

The invention relates to an implement for automatically detaching and displacing an amount of feed, such as for example silage and/or hay, from a stock of feed, said implement 1 being provided with a robot arm 2 with a detaching member 3 which is suitable for detaching a part of the feed from the stock and displacing it to a predetermined place and depositing it there.
